

Production of WIA Youth Performance Measures for the Youth Opportunity Program For Non-ADS* Sites

As you are aware, YO grantees will be evaluated using the WIA youth performance measures as proscribed by the Workforce Investment Act. This cannot be done without State cooperation in obtaining wage record data.

States will calculate the following WIA older and younger youth measures and provide the rates, numerators and denominators to YO sites. These numerators, denominators and rates must be calculated as specified in Training and Employment Guidance Letter No. 7-99, dated March 3, 2000.

- 1) Older Youth Entered Employment Rate
- 2) Older Youth Retention Rate
- 3) Younger Youth Retention Rate
- 4) Older Youth Earnings Change
- 5) Older Youth Credential

Designated State staff will periodically receive a file extract from the YO site. The State will match this file against its wage record file by social security number (SSN) as it does with WIA youth records. Exhibit 1 is a list of the minimum data fields that the State requires to calculate the performance measures. You should discuss with your State contact the final format of any files to be sent.

Exhibit 2 is a conceptual timeline detailing the timing of participant/program activities and data/matching activities for the five rates. This timeline indicates the quarters in which extracts are sent to the State for each participant, when the State captures earnings data, and when the State calculates the rates. Exhibit 3 is a calendar indicating when extracts of enrollees with WIA Measurement Dates in specified WIA Measurement Quarters are sent to States. Note that States receive two extracts for every WIA Measurement Quarter. The first extract is sent three quarters after the specified Measurement Quarter, and contains data necessary for calculating the Older Youth Entered Employment Rate. The second extract is sent five quarters after the specified Measurement Quarter, and contains data necessary for calculating the other four measures.

These instructions and exhibits are also being sent to the State contact to whom you will send the extract files and from whom you will receive the calculated rates, numerators and denominators, where that contact information is available.
